

PROTERRACE DRAIN DRIP is an edging profile in varnished aluminium, designed to protect the edges of the tiles on terraces and balconies and to allow the downflow of water. The profile is provided with a flange that ensures the right fixing and an adhesive stripe, which protect the outflow holes to be closed by silicone. To reach a right connection between profile and the waterproofing system it's needed to use **PROBAND 150** with **PROBAND KOLL/AB**. The product is also available on request with a **SPECIAL SEASIDE PRE-TREATMENT** which increases its resistance to corrosion when installed at sea front environments.

EXAMPLES AND INSTRUCTIONS FOR LAYING METHODS

1. Choose PROTERRACE DRAIN DRIP according to the tile thickness and desired colour.
2. Fix the external corners to the screed (at least 1 cm from it) with nails.
3. Fix the draining adhesive stripe in polyurethane on the vertical side of the profile.
4. Cut the PROTERRACE DRAIN FDP at desired length joining it to the corners using the linking elements and fix it with nails to the substrate.
5. Lay the desired waterproofing system.
6. Lay the tiles leaving at 5 mm between the tile and the profile.
7. Seal the space between tile and profile with **PROBAND FIX (P.186)**.
